Sustained growth on the back of strong fundamentals

China's newly implemented truck overload restrictions positively impact truck and trailer demand in China

Truck overload restrictions

- * Implementation of new regulation on truck overload restrictions (GB1589)
 - * No transition phase permitted
- * New restrictions on truck and trailer dimensions:
 - * Length of maximum 22.0 meters of truck and trailer combination
- * For example, car carriage capacity significantly drops
- * From c.22 cars per vehicle to 6 – 10 cars per vehicle depending¹
- * The key positive implications for JOST:
 - * **Higher number of swivel points** in a truck (eg replacement of rigid with articulated trucks)
 - * **Replacement demand** for existing fleet
 - * Higher **focus on quality and safety** of couplings
